

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Original) Container for containing foodstuff, which container comprises:
  - a bottom;
  - a peripheral wall integral with the bottom and extending upwardly from the bottom and defining a mouth opening;
  - a closing foil arranged onto the mouth opening;
  - at least one support element arranged on the bottom at a position corresponding to the edge of the mouth opening, such that in a stacked position of at least two identical containers, the support element of the first container rests on the edge of the mouth opening of the second container wherein at least three support elements in the form of a bulge are formed in the bottom and side wall and protrude beyond the bottom plane.
2. (Original) Container according to claim 1 wherein the bulges protrude beyond the peripheral wall.
3. (Currently amended) Container according to claim 1 ~~or 2~~, wherein a ring is arranged on the mouth opening, wherein the closing foil is arranged on the ring and in a stacked position of two identical containers, and wherein the support element of the first container rests on the ring of the second container.
4. (Currently amended) Container according to ~~any of the preceding claims~~ claim 1, ~~comprising wherein~~ the at least three support elements are evenly distributed over the bottom.

5. (Currently amended) Container according to ~~any of the claims 1-4~~claim 1, wherein the support element comprises a protruding rim.

6. (Currently amended) Container according to ~~any of the preceding claims~~claim 1, wherein the support element is arranged inside the produced part of the peripheral wall.

7. (Currently amended) Container according to ~~any of the preceding claims~~claim 1, wherein the bottom and the peripheral wall integral with the bottom are connected via a rounded off corner portion.
